

# Integrated Home Care Services

I am a 78-year-old singleton elderly. I could take care of myself in the past. However, after falling down in an accident, I have been blind which has greatly affected my self-care ability. Neither could I go out, nor did I feel optimistic about living in the community.

The centre provides a range of services, including meal delivery service, general household or domestic duties, purchase, strolling, escort duties which enable me to keep on living in the community with dignity and a sense of security.
